I. What is Risk Leadership?

A. Risk Management is the identification, assessment, and prioritization of risks followed by coordinated and economical application of resources to minimize, monitor, and control the probability and/or impact of unfortunate event or to maximize the realization of opportunities. The strategies to manage risk typically include transferring the risk to another party, avoiding the risk, reducing the negative effect or probability of the risk, or even accepting some or all of the potential or actual consequences of a particular risk. *(Source: Wikipedia)*

B. Risk Leadership is the proactive approach by campus organizations to conduct themselves in a manner conducive to a positive membership experience, attendance at an event, or interaction with the organization. It requires respect for others, appropriate conduct before, during, and after organizational meetings, events, and trips, and a desire for membership and/or participation in and/or with the organization to be an enjoyable part of one's educational experience. *(Source: Dave Kelly)*
